Dear Mr. Carlson

Re: Dangerous waste compliance inspection Long Painting (WAD 044036747) on 5/7/99.

Thank you for your time during our recent inspection. The purpose of this inspection was to determine the facility's level of compliance with the Washington State Dangerous Waste Regulations (Chapter 173-303 WAC). These regulations establish a system for safe and responsible management of dangerous waste. The following attachment provides a description of violations identified at your site and the actions to be taken to correct them.

The training plan, employee training records, and hazardous waste manifests were unavailable for review at the time of this inspection. The regulations state that all generator records will be made available and furnished upon request. Provisions should be made by Long to assure that these records are available for review at all times.

Please take the necessary actions to come into compliance with the requirements and send written certification of compliance to me by June 21, 1999. Please be aware that any uncorrected violations are subject to enforcement action by Ecology, including the issuance of an administrative order and/or penalty under the Hazardous Waste Management Act (RCW 70.105.080 and .095).

Do not hesitate to contact me at (425) 649-7216 if you have any questions regarding this letter.

Sincerely,

A handwritten signature in dark ink, appearing to read "Robert A. Stone".
